

See: Suzuki launches its flagship model, the Grand Vitara in South Africa

The all-new Suzuki Grand Vitara is now available at Suzuki dealerships throughout South Africa. It comes only a few months after Suzuki Auto South Africa debuted its new flagship to the public and media at last year's Festival of Motoring.

The Grand Vitara is offered with two distinct drivetrain options, including Suzuki Auto South Africa's first-ever mild hybrid petrol-electric powertrain, three different transmission options and the option of two- or four-wheel drive.

All models can be ordered with the choice of arctic white, splendid silver, opulent red, grandeur grey, celestial blue, midnight black and pearlescent versions of arctic white and cave black.
