

Edge Growth to manage SAB Thrive Fund

SAB Thrive Fund has appointed Edge Growth, a small business development specialist, to manage investments in this enterprise and supplier platform, with the aim of transforming the SAB supply chain.

Almost 90% of SAB's supply chain is localised, enabling it to expand and improve existing business efficiency and open up more opportunities for entrepreneurs.

Edge Growth, with over a decade of industry experience, will now play an important role as a business development partner to The SAB Thrive Fund. As part of this partnership, Edge Growth will enable the redeployment of funds into new suppliers to address gaps in SAB's supply chain. Integration of black principals into the management structure is also an important support component, including the provision of comprehensive business coaching.
