Education level:DegreeJob level:SeniorOwn transport required:Yes

Reference: #SolArch03152024

Company: RecruitU

A Western Cape-based financial and investment services company are requiring a solution architect to join their team on an 8-month contract (with the possibility of renewal).

Role overview

The senior solution architect primarily works with the business domain experts and business leadership to craft a solution that is fit for purpose from a business perspective.

Consequently they focus their attention on a smaller facet of service (the solution package) to make sure that it operates effectively as part of the whole as well as independently as a stand-alone solution.

- Focusses on the technical and business feasibility of a solution and ensure that it fits within well-established patterns and guidelines laid down by the enterprise architects and solution practice architects
- Takes responsibility for the quality, commercial compliance and technical integrity of the solution being delivered back into the business
- Works actively with senior technology/platform systems analysts from across the operational space (both internal subject matter experts and those of the chosen suppliers)
- Could have a small team of solution architects under his/her guidance

Key results areas

Compliance

- Ensures delivery fits within the guidelines laid down by the enterprise/solution practice architects and is in compliance with the IT strategy
- Oversees the implementation of new solutions to ensure they adhere to the signed off solution architecture designs

Financial control

• Understands the fiscal components of a solution to ensure it satisfies the commercial requirements of the business and is sustainable, adaptable, and practical within the RUN model

Personal effectiveness

- · Ability to explain the complex in laymans terms to bring technology to the masses
- · Accepts and lives the company values

- · Accountable for service delivery through own efforts
- · Collaborates effectively with others to achieve personal results
- Individually accountable for managing own time, tasks and output quality for periods of 3 months to 1 year
- · Plans workload vs work demand for a small team of solution architects

Strategy

- Models and defines the financial implications and considerations of potential solutions
- Models, defines and collaborates around designs with business and enterprise stakeholders
- Provides options and recommendations to business stakeholders to ensure that they can make the best business decisions based on the different solution alternatives and patterns

Technical consultation

- Analyses business processes to determine how IT investment could deliver value through improved cycle times, lower costs, improved quality
- Builds the detailed transition plan for the more effective exploitation of IT investments
- · Defines a solution and ensure that it:
- 1. Meets the business requirements
- 2. Meets the non-functional requirements
- 3. Fits within the guidelines laid down by the enterprise / solution practice architects
- 4. Is in compliance with the IT strategy
- 5. Can be readily leveraged by other parts of the business
- Responds to stakeholder needs and influences the development of alternative solutions

Requirements: skills, qualifications and experience required

- Matric
- BSC
- Broad- IT knowledge and strong problem-solving skills
- IT Technical skills. (Java, Java Script)
- Able to model different architecture views including conceptual, logical and detailed physical designs in order to facilitate discussions with both business and technical stakeholders
- Grasp of IT concepts, patterns, principles
- · Policy Administration knowledge
- · Cloud certification, specifically AWS
- SAFe architecture certification or familiarity with Agile architecture

Competencies

- Strategic
- · Change as a way of executing
- · Leading with influence
- Collaboration (Diversity and Inclusion)
- · Agile Innovation
- Customer First, Personal Mastery (Lifelong Learning)
