

Living Soil: A documentary for all of us

Living Soil is a 60-minute documentary that features innovative farmers and soil health experts throughout the USA. It was directed by Chelsea Myers and Tiny Attic Productions based in Columbia, Missouri, and produced by the Soil Health Institute through the generous support of The Samuel Roberts Noble Foundation.

Our soils support 95% of all food production, and by 2060, our soils will be asked to give us as much food as we have consumed in the last 500 years. Soil filters our water. Soil is one of our most cost-effective reservoirs for sequestering carbon. Soil is our foundation for biodiversity.

Watch the Living Soil documentary below to understand the journey of soil.
