

Cookieless world

Issued by [Wunderman Thompson](#)

13 Apr 2021

Consumers' personal data is shared between tech companies in the third-party cookie ecosystem over 500 billion times a day.

That is changing.

At least 90% of consumers want brands to be clearer about how they use their data, and to give them more control over it. In January 2022, Google Chrome will no longer allow the tracking of third-party cookies, meaning brands will cease to have access to much of the data they currently use to target audiences and drive online sales.

The impact of this on advertisers and publishers won't be beneficial, however, there's an upside for general internet users and consumers. Naturally, advertisers will see the third-party audience shrink, which will negatively affect media buying activities. At the same time, publishers will feel partnership disruptions with third-party data providers. Internet users, in general, will have more secure data privacy (GDPR/PoPIA), and consumers will have more control over data sharing.

A total of 80% of consumers feel they cannot control the security and privacy of their personal data. And they would be right, an average user visiting [news24.com](#) will have their data shared 410 times in the first 15 seconds on the website.

The ingenious Facebook trap: Is it time for ensnared brands to cut their losses?

Ewoudt Cloete, Wunderman Thompson 22 Nov 2017

Ambitious brands do not need to share their customers' data. They know how to create direct, valuable relationships that inspire growth. They use data expertise, not intrusive tracking, to see people clearly.

Ambitious brands use data with integrity.

The world's most inspiring brands are data and privacy leaders, who use data with integrity to inspire confidence among consumers. These include global brands such as Amazon, Apple, Emirates, Google, Netflix and Adidas. Locally, the leading brands include Woolworths, Discovery, Samsung, OUTsurance and Coca-Cola.

The inspiring study developed by Wunderman Thompson found ways in which inspiration can drive brand growth by predicting:

- a brand's ability to drive demand
- a brand's ability to command higher prices
- a brand's ability to convert customers at a purchase point

This talks to the trust customers have in brands and, of course, data privacy plays an integral part. This is also supported by BrandZ's top 30 most valuable South African brands 2020, which includes brands such as FNB, Standard Bank, Absa, Discovery, Woolworths, etc.

8 golden rules for brands to win in a recession

Wunderman Thompson 31 Jul 2020

One of the county's largest marketing services agencies, Wunderman Thompson SA, boasts expertise as a technology and data-driven creative powerhouse. It aims to help ambitious brands drive conversations in this regard.

Palesa Molukanele, agency head of data, insights and analytics, expressed: "We are part creative agency, part technology company and part consultancy, and so we will help our clients prepare to optimally function in a 'cookie-less world' by building short-, medium- and long-term strategies for them. And we have a solution that we're delivering on now. Wunderman Thompson has a solution – and we're delivering it now."

Palesa Molukanele

Resolve is our turnkey, cookie-less performance marketing technology that drives growth for brands and protects data privacy. Resolve uses AI to better recognise customers and personalise CRM, media and e-commerce experiences without sharing their data or using third-party tracking.

We believe the world's most inspiring brands need an inspiring approach to privacy and personalisation – and must act now to safeguard the effectiveness of their online ad spend if they are to continue driving growth.

"Resolve does three things – it recognises customers, like humans do; it learns more about customers as people; and it finds the brand's next, best customers. The fact that those 'shoes' you just searched for are now following you around the web has raised valid data privacy and ethics concerns. We're here to help businesses, marketers, chief data officers and chief technology officers take heed of this reality check," said Alex Steer, chief data officer, EMEA, Wunderman Thompson.

Resolve will be the industry's first privacy personalisation technology of its kind, and you can learn more about it [here](#).
